PROFESSIONAL SUMMARY

Java Full Stack Developer specializing in backend-focused application development using Java, Spring Boot, React, PostgreSQL, Redis, and Kafka. Experienced in building scalable APIs, distributed systems, authentication workflows, and database-driven applications through hands-on product engineering projects.

TECHNICAL SKILLS

- **Languages** — Java, SQL, JavaScript
- **Backend** — Spring Boot, Spring Security, REST APIs, JWT Authentication, Microservices ,Spring Data JPA
- **Frontend** — React.js, TypeScript, Tailwind CSS
- **Databases** — MongoDB, PostgreSQL, MySQL, Redis
- **Tools** — Docker, Kafka, Git, GitHub, Postman
- **Core Engineering** — OOP, DSA, Database Design, Authentication & Authorization, Distributed Systems

PROJECTS

- NutriLens**  , Java, Spring Boot, React, PostgreSQL, Redis, Kafka

12/2025 – Present

 - Built a distributed nutrition intelligence platform for dietary analytics and recommendation workflows.
 - Architected microservices for authentication, analytics, leaderboards, and notifications.
 - Leveraged Kafka and Redis for event-driven processing and low-latency data access.
 - Integrated monitoring and observability for system health and performance tracking.
- FocusLoop**  , Java, Spring Boot, React, PostgreSQL, Redis, Kafka

02/2026 – Present

 - Developed a distributed productivity platform for focus tracking and behavioral analytics.
 - Implemented secure authentication and session-management workflows.
 - Built real-time collaboration, leaderboard, and analytics capabilities.
 - Designed scalable backend services with monitoring and performance visibility.
- Portfolio Website**  , React, TypeScript, Tailwind CSS

 - Built a personal portfolio showcasing projects, technical skills, and engineering work.
 - Centralized access to GitHub repositories, project case studies, and additional projects.

EXPERIENCE

- Nexverse Digital Studios**, Technical Team Member

08/2024 – 10/2024 | Pune, India

 - Collaborated with a 15-member startup team on web application development and product initiatives.
 - Contributed to feature implementation, testing, and iterative product improvements.
 - Worked in a collaborative Agile environment supporting product delivery across multiple projects.

ACHIEVEMENTS & LEADERSHIP

- Solved 500+ DSA problems across LeetCode and coding platforms.
- Active participant in MLSA and GDSC technical communities.
- Demonstrated leadership, teamwork, and problem-solving through community initiatives and technical events.

EDUCATION

- G.H. Rasoni College of Engineering and Management, Pune,**
Bachelor of Technology in Computer Engineering (CGPA: 7.04/10)

07/2023 – 06/2027
